PROFESSIONAL SUMMARY

Final-year Computer Science (Data Science) undergraduate seeking software engineering and full-stack internships. Built and deployed MandiPulse using React, FastAPI and Supabase, integrating official market prices and Gemini APIs. Experience with REST APIs, database access controls, automated testing and team-based NLP projects.

EDUCATION

Sai Vidya Institute of Technology — Bangalore, Karnataka
B.E. in Computer Science & Engineering (Data Science) — *Expected 2027*

Sri Saraswati Vidyaniketan — Bangalore, Karnataka
12th Standard (PCMC)

New Indus Valley Residential School — Bangalore, Karnataka
10th Standard

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C
Frontend: React, HTML, CSS, Vite
Backend & APIs: FastAPI, Flask, REST APIs, Gemini API, Supabase Auth
Databases: PostgreSQL (Supabase), MySQL, SQLite, ChromaDB; Row-Level Security (RLS)
AI & ML: PyTorch, TensorFlow, NumPy, scikit-learn, OpenCV, Retrieval-Augmented Generation (RAG)
Tools: Git/GitHub, Vercel, Postman, automated testing
Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

PROJECTS

MandiPulse - Karnataka Market Assistant | *React, FastAPI, Supabase*
- Developed and deployed a React/FastAPI assistant on Vercel, integrating official AGMARKNET records and Gemini APIs for crop queries and market-price comparison tables.
- Implemented buying plans in kg, quintals and tonnes, freight/budget estimates and PDF exports; configured Supabase Auth/RLS and verified logic with 203 automated tests.

Kannada Chandas Identifier | *Python, Flask, Rule-Based NLP*
- Collaborated in a four-member team to develop and deploy a Flask application on Render that identifies poetic meters in classical Kannada poetry.
- The rule-based pipeline processes Unicode syllables, classifies Laghu/Guru patterns and matches traditional meters; the app supports poem analysis, image scanning, history and PDF export.

Academic Resources Bot | *Python, RAG, ChromaDB, LLaVA - In Progress*
- Collaborating in a four-member team on a Telegram academic assistant that retrieves answers from college course PDFs using a RAG pipeline.
- Developing PDF extraction and ChromaDB vector indexing workflows, including multimodal processing of text and diagrams with LLaVA.

Palm Leaf Manuscript Translator | *Python, PyTorch, Computer Vision - In Progress*
- Collaborating in a four-member team on an image restoration, OCR and translation pipeline for converting degraded Old Kannada palm-leaf manuscripts into modern Kannada.
- Developing a U-Net model with a ResNet34 backbone for manuscript binarization; reviewed 12+ research papers on image processing and Kannada NLP to inform the design.

CERTIFICATIONS

Machine Learning Specialization - Stanford University & DeepLearning.AI (Coursera)
- Completed three courses covering supervised learning, neural networks, clustering, recommender systems and reinforcement learning, with practical model implementations.

LEADERSHIP & EXTRACURRICULAR

PR Team Lead - *Big-O (Competitive Coding Club), Sai Vidya Institute of Technology*
- Organized competitive coding contest events and managed outreach and social media promotion to drive student participation.
- Coordinated with sponsors to support club events and initiatives.

Languages: Kannada and Telugu (Native/Bilingual); English (Professional Working Proficiency).
